Copper State Fluid Power

Press Release

Distributorship Appointment of Two Manufacturers' Lines

Tucson, AZ March 24, 2020: Copper State Fluid Power has gone 'global' by proudly announcing the addition of two new manufacturers' product lines to its list of authorized supplier/distributorship. RuB Inc and MHA Zentgraf GmbH are internationally renowned leaders in precision flow control equipment and have a distinguished history of over 60 and 42 years respectively.

RuB Inc (*Mazzano, ITALY*) is a global provider of high quality flow control valves and actuators. Rub manufactures low pressure ball valves and actuators for a wide range of industrial applications. Their products are designed and engineered for long life and reliability, under strict quality compliance manufacturing controls and certifications.

MHA Zentgraf GmbH (*Merzig, GERMANY*) specializes in fluid dynamic solutions. Their flow control technology provides precise and reliable management of any manner of liquids or gasses. Their German-engineered high pressure ball and control valves are used in many industrial applications throughout the world.

Since opening its doors in January 2017, Copper State Fluid Power has become the authorized distributor for a wide variety of manufacturers, providing parts such as hose assemblies, fitting, valves, gauges, adaptors, motors, cylinders, O-rings, seals, air prep products and more. All are stocked in their warehouse offering immediate delivery to customers, especially important for those with urgent down-time situations.

Mr. Gamez, CEO and owner of Copper State Fluid Power brings over 35 years of experience in the hydraulic and pneumatic industry, providing repair and servicing of all hydraulic and pneumatic systems and equipment. His team provides repair and restoration services to cylinders, pumps and valves as well as offering custom machining services with a fully equipped machine shop, which include lathe, end mill and welding machines.
