

DRIVEN BY AIR.

### **PCL Couplings**

This year marks three quarters of a century since PCL manufactured and patented the first “Made in Sheffield” coupling, which has become an essential piece of kit in workshops all over the world.

PCL’s core lines of couplings – Airflow, Vertex and XF-Euro – are now manufactured with a distinctive blue silicone band to define them as genuine “Made in Sheffield” products.

PCL is so sure of the quality of its new, improved coupling, it now comes with an extended 5-year warranty, as does the industry-proven Safeflow Safety Coupling, which features a blue sticker as the PCL mark of authenticity.
