

## The Full Solution to All your Hydraulic Needs

Trident Hydraulics are leaders in the design, manufacture and supply of hydraulic systems and circuits, allowing you to get all your hydraulic equipment with ease in one place...

- HIGH-SPEC, CUSTOM DESIGNED HYDRAULIC SYSTEMS are designed by inhouse engineers, that can efficiently meet your specific needs. The experienced and passionate engineers keep up to date with system design and use state-of-the-art 3D Solidworks CAD software to provide the highest quality.
- BESPOKE MANIFOLD BLOCKS are designed and manufactured in-house by 'Trident Machining'. This enables rapid turnaround time and ensures specific requirements can be met. The machinists are consistent in producing clean, high precision, high quality manifolds.
- HYDRAULIC COMPONENTS from trusted, quality brands such as Argo-Hytos, Salami, Settima and Fluid Press can also be supplied. Including, a wide range of Hydraulic Pumps, Valves, Filters, and power unit accessories that can meet the rarest of needs.

Trident enjoy working with both large and small companies from a variety of different industries and can take your company forward with the finest equipment and ongoing support to provide the solutions and service necessary, no matter your requirements.

Contact Trident now to fulfil any of your Hydraulic needs!
