

TURKISH DELIGHT

**Trident is delighted to be the sole authorised distributor
in the UK & Ireland for Turkish HPT.**

After three years of testing HPT Piston pumps and motors in the field, response from our partners and clients has been outstanding. The performance of HPT pumps and motors by far outperforms its competitors. This is due to the innovation and design of the 5 piston triple seal reducing the leakage rate in the case drain minimising heat, wear and noise ensuring greater life expectancy and higher efficiency.

These pumps and motors are highly flexible allowing you to change the CC to your requirements. In addition to OEM, HPT is an excellent retro fit replacement for the services side.

Trident will be offering a two year warranty on HPT piston pumps and motors.
