

Brammer exhibiting at Hillhead 2016

Brammer, the UK's leading supplier of maintenance, repair and overhaul (MRO) products and services, will be showcasing its extensive range at Hillhead 2016 between 28th and 30th June.

With extensive experience supporting some of Europe's leading construction and aggregates companies, the show will see Brammer showcase a selection of its MRO products which can withstand the hard conditions associated with the industry, including spherical roller bearings, high performance chains, and gearboxes.

It will also be exhibiting a range of products which have been specifically designed and adapted for the aggregates and quarrying industry, including vibration screens, wireless condition monitoring systems for crushing applications, and hydraulic power units (HPU). Personal protection equipment (PPE) and hand and power tools will also be on show from leading manufacturers including Roebuck and Q –safe.

Brammer's industrial vending service, Invend™, will be on display on board its dedicated demonstration vehicle. Invend™ offers companies an innovative way to manage their MRO supply, dispensing a wide range of industrial consumables, including abrasives; cutting tools; PPE and lubricants and greases. Launched last year, Invend™ has already been installed widely across the UK and Europe, helping companies reduce industrial consumable consumption by between 25 and 40 per cent.

Also in attendance at the show will be its Mobile Centre of Excellence – a custom-built education and awareness training vehicle which offers visitors a hands-on experience and showcases the latest innovations, with product displays from many of its leading brands. Its specialist Tool Demonstration Vehicle, equipped with products from more than 20 leading suppliers including Roebuck, Stanley, and Bosch, will also be at the show for the first time – providing visitors with a truly interactive experience, and enabling them to handle and try out the products for themselves.

Brammer will be joining over 450 exhibitors at the event which will also play host to live machinery demonstrations and interactive stations, as well as numerous static displays which include plant and equipment from large excavators and crushers right through to lubricants and wear parts.

Peter Malpas, UK Group Sales Director, Brammer, said: "We're delighted to once again be exhibiting at Hillhead, and offer attendees the opportunity to visit our specialist mobile units, which will be specially customised to the needs of visitors working within the quarrying and construction industries. Our specialist technical team will also be on hand to guide visitors through product functionality and offer advice and guidance.

"We have been providing MRO solutions to quarrying and aggregate companies for many years, and it's this experience which has enabled us to ensure we constantly deliver products which are not only high-quality and reliable, but are designed to withstand the harsh applications typical of the industry."

Brammer can be found at stand **B14** at Hillhead 2016, and for more information about the exhibition visit www.hillhead.com.

Notes

Brammer

Brammer UK is part of Europe's leading technical specialist distributor of industrial, maintenance, repair and overhaul (MRO) products and services, with an extensive product range covering bearings, mechanical power transmission products, pneumatics, hydraulics, seals, industrial automation as well as tools and general maintenance.

The company's mission is to 'add value at every turn', by saving its customers money within three critical business areas: reducing total acquisition costs, improving overall production efficiency, and reducing working capital. It does this by combining technical expertise with excellence in supply chain logistics, purchasing and the management of third-party providers. Services include vendor-managed inventory, product standardisation and Brammer's Insite™ service – effectively a Brammer branch located within a customer premises, geared entirely to meeting that customer's needs in terms of stockholding, opening hours and technical expertise.

Since 2008, operational cost savings exceeding £146 million have been achieved by Brammer for its customers in the UK.
