

CAMOZZI LAUNCHES NEW UK SHORT FORM CATALOGUE

Camozzi Automation Ltd, a producer and supplier of components, systems and technologies for the industrial automation, life science and transportation sectors, has announced the launch of its new UK Short Form Catalogue.

NUNEATON, MAY 17, 2022 — Camozzi is pleased to announce the launch of its new UK short form catalogue. The company, a leading producer and supplier of components, systems and technologies for the industrial automation, life science and transportation sectors, has released its [new catalogue online](#) and in hard copy format.

The new catalogue features almost 400 pages of Camozzi pneumatic, electric actuation and proportional components, and is complemented by the addition of process valves, actuators, hydraulic couplings and solenoid valve connectors.

For OEM design engineers, end-user maintenance engineers, and resale staff, the catalogue provides a valuable resource when it comes to product selection. Accompanying accessories are laid out clearly to further expedite the product selection process. The catalogue is designed to provide engineers with links to more detailed technical data when it is required. In addition to the individual components available in its catalogue, Camozzi can supply bespoke solutions to suit specific applications.

Those who require a hard copy can send their contact details to marketing@camozzi.co.uk.

About Camozzi Automation Ltd

Camozzi Automation – (<https://store.camozzi.co.uk>)

Camozzi Automation is a division of the Camozzi Group, an Italian multinational established in 1964 and leader in the production of components and systems for industrial automation. It also operates in various other sectors, from machine tools to textile machines, to many different procedures for processing raw materials.

The Camozzi Automation division offers a product range including components, systems and technologies for the industrial automation sector, the control of fluids - liquids and gases - and applications dedicated to transportation and life science.

Camozzi Automation's offering includes ever more IIoT products and solutions. We work to realise the digitalisation of production processes and on the creation of real cyber-physical systems through which it becomes possible to integrate mechanical, electronic and digital elements, constantly improving process performance.

The Camozzi Group is present in 75 countries worldwide with 30 subsidiaries, 5 operating divisions and 18 production sites. Camozzi Automation has 1,700 employees, 25 subsidiaries and 7 production sites.
