

### MESSAGE FROM THE EDITOR

**Hydraulics & Pneumatics** is the UK's only publication dedicated exclusively to buyers and users of fluid power equipment and related technologies across a broad spectrum of industries, including manufacturing, engineering, construction, offshore oil & gas, and transport.

We are uniquely positioned to provide critical updates and insights on the latest advancements in fluid power, motion control, and the increasingly important role of digitalisation in optimising these systems.

The publication covers a wide range of topics, offering expert analysis and updates through news, technical features, interviews with industry leaders, and in-depth product reviews. We also focus on the integration of digital technologies, such as advanced sensor systems, IoT, data analytics, and automation, which are transforming hydraulic and pneumatic systems by enhancing control, improving performance, and boosting overall efficiency in real time.

Alongside this, we provide essential guidance on maintenance, repair, refurbishment, energy efficiency, training, and health & safety to help end-users maximise the lifespan and effectiveness of their equipment.

We are also proud to publish the annual Hydraulics & Pneumatics Buyers' Guide, an invaluable procurement resource for sourcing fluid power systems, components, and services. This guide, alongside our regular content, supports professionals in making informed decisions in an increasingly complex technological landscape.

Through our close affiliations with leading industry bodies such as the British Fluid Power Association (BFPA), the British Compressed Air Society (BCAS), and the British Valve & Actuator Association (BVAA), we maintain a strong presence at the heart of industry discussions. These partnerships enable us to stay at the forefront of fluid power innovation, ensuring that we continue to be a trusted voice in the sector.

Published by DFA Media Group, which also produces the BFPA Yearbook and Members' Directory, Hydraulics & Pneumatics is committed to being the definitive resource for the fluid power industry. Our mission is to provide timely, relevant information that keeps professionals informed about the latest trends, technologies, and challenges within the industry—particularly as digitalisation continues to shape the future of hydraulics and pneumatics.

Aaron Blutstein Editor Hydraulics & Pneumatics

**Talking Industry** is a series of unscripted online panel discussions organised by the DFA Media Group, in which experts from the worlds of Plant, Works, Maintenance & Factory services will discuss issues of vital importance to the sector. The sponsored panel will discuss three key topics, each with an interactive Q&A session with the viewers. Limited to just 5 sponsored panel places this is an exclusive platform for you to showcase your company as a thought leader in its field. Promotional coverage is extensive before, during and after the airing, including a full write up in the magazine. Panellists will receive contact details of viewers and sign ups making Talking Industry a valuable lead generation exercise.

To find out more information and to book your sponsored place contact the sales team. www.talkingindustry.org

### WHO'S READING THE MAGAZINE? WHAT THE ABC FIGURES MEAN

Hydraulics & Pneumatics offers the advertiser the best value for money when targeting the decision makers within the UK Industrial maintenance market with a strong circulation that is current and relevant: and reflective of the size of the market, our strengths lie in the fact that our circulation is 100% controlled and 100% individually requested offering current and relevant value. In today's

market where magazine circulations can be misleading, we endorse our claim, with the highly respected and acclaimed ABC certification, offering you piece of mind that we deliver all of our magazines to the relevant people in this highly competitive industry. Be aware of requested magazines with high Non-Controlled figures.

### **MECHANICAL DATA & CONTACT DETAILS**

#### **MATERIAL REQUIREMENTS**

Printed Web Offset. Advertising copy can be supplied as Press-Optimized pdf, high-resolution eps / tiff / jpg files or QuarkXpress / InDesign files (including all support files and fonts). All graphics should be supplied at 300dpi at size to be used. All colours should be CMYK or grayscale for mono. Please also supply a colour proof to the Production Manager at the address below as we cannot be held responsible for any colour variations otherwise. Please contact our Production Manager, Chris Davis with any gueries regarding supply of material, reproduction, etc.

#### **ADVERTISING COPY DEADLINES**

All advertising copy needs to be supplied in the correct format by the end of the third week of the month preceding the issue date. For example for the September issue all ad copy needs to be supplied in the correct format by 7th September.

#### **EDITORIAL SUBMISSION INFORMATION**

All editorial submissions must be emailed to the editor by the first Friday of the month preceding the issue date. For example the deadline date for the October issue is the 5th October.

#### **LOOSE AND BOUND INSERTS**

Please contact our Production Manager, Chris Davis, for mechanical data and insert delivery procedure.

#### **CANCELLATIONS**

Cancellation or suspension of an insertion must be made in writing to the appropriate individual publication(s). All cancellations are subject to a minimum of six weeks prior to final copy date.
