Hydraulics & Pneumatics

THE JOURNAL OF FLUID POWER AND SYSTEMS

Media Information 2027

www.hpmag.co.uk

MESSAGE FROM THE EDITOR

Hydraulics & Pneumatics is the UK's only publication dedicated exclusively to buyers and users of fluid power equipment and related technologies across a broad spectrum of industries, including manufacturing, engineering, construction, offshore oil & gas, and transport. We are uniquely positioned to provide critical updates and insights on the latest advancements in fluid power, motion control, and the increasingly important role of digitalisation in optimising these systems.

The publication covers a wide range of topics, offering expert analysis and updates through news, technical features, interviews with industry leaders, and in-depth product reviews. We also focus on the integration of digital technologies, such as advanced sensor systems, IoT, data analytics, and automation, which are transforming hydraulic and pneumatic systems by enhancing control, improving performance, and boosting overall efficiency in real time. Alongside this, we provide essential guidance on maintenance, repair, refurbishment, energy efficiency, training, and health & safety to help end-users maximise the lifespan and effectiveness of their equipment.

We are also proud to publish the annual Hydraulics & Pneumatics Buyers' Guide, an invaluable procurement resource for sourcing fluid power systems, components, and services. This guide, alongside our regular content, supports professionals in making informed decisions in an increasingly complex technological landscape.

Through our close affiliations with leading industry bodies such as the British Fluid Power Association (BFPA), the British Compressed Air Society (BCAS), and the British Valve & Actuator Association (BVAA), we maintain a strong presence at the heart of industry discussions. These partnerships enable us to stay at the forefront of fluid power innovation, ensuring that we continue to be a trusted voice in the sector.

Published by DFA Media Group, which also produces the BFPA Yearbook and Members' Directory, Hydraulics & Pneumatics is committed to being the definitive resource for the fluid power industry. Our mission is to provide timely, relevant information that keeps professionals informed about the latest trends, technologies, and challenges within the industry—particularly as digitalisation continues to shape the future of hydraulics and pneumatics.
